*Using Data/Getting Results: A Practical Guide for School Improvement in Mathematics and Science with CD-ROM* by Nancy Love

Here's ready-to-use help for anyone involved in leading mathematics and science reform at the school or district level—practical strategies and ideas that help you become an active inquirer into how to best improve learning for all students. Here you get the guidelines, tools, and skills you need to take full advantage of the potential for using data as a catalyst for change. The ideal combination of practical tools and a conceptual framework for understanding data-driven reform.

*"Using Data/Getting Results is the best resource I've seen for schools and districts embarking on the process of analyzing data to bring about systemic change. It clearly lays out the rationale, the steps, and the resources for utilizing data to fuel continuous improvement."*

Gay Gordon, Associate Director of Publishing, Eisenhower National Clearinghouse
