

Exploring Earth from Space: Lithograph Set and Instructional Materials

Website: <http://www.earthkam.ucsd.edu>

Publisher: [NASA Educator Resource Centers](#)

These materials provide educators with the resources necessary to begin using space imagery in the classroom. The lithographs showcase color images of Earth taken from the Space Shuttle by astronauts and by middle-school students participating in NASA EarthKAM, a collaborative project in which TERC is involved. The instructional materials include background information and guidelines for educators, for help in learning about the images and their use in the classroom, plus student sheets.
