

# Using EarthScope Data in Secondary Classrooms

**Principal Investigator:** [Tamara Shapiro Ledley](#)

**Funders:** [National Science Foundation](#) and [UNAVCO](#)

TERC is improving the educational outreach for EarthScope, a partnership between NASA, the NSF, and the US Geological Survey using modern technology to investigate the geological processes shaping the North American continent. TERC is working with scientists at UNAVCO to develop a new chapter for the Earth Exploration Toolbook to make complex data accessible and useful to educators.
