

GeniGUIDE

Principal Investigator: [Karen Mutch-Jones](#)

Funders: The National Science Foundation

Website: <https://concord.org/projects/geniguide>

The goal of the GeniGUIDE project is to improve student learning of genetics content by developing and researching a layered learner guidance system that aids students and informs student-student and student-teacher interactions. SEEC will document the development and research process and evaluate how the GUIDE system is used and contributes to the teacher and student experience.

Clients/Collaborators: Concord Consortium, North Carolina State University
