

Windows on Earth: CASIS

Funders: [National Aeronautics and Space Administration](#) and the [Center for the Advancement of Science in Space \(CASIS\)](#)

Website: <http://www.windowsonearth.org/>

Windows on Earth is the standard tool for astronauts to use on the International Space Station to support Earth observations and photography. CASIS manages the science and education projects on the ISS, and is funding TERC's development and deployment of Windows on Earth for permanent, on-orbit use.
